

ENVIRONMENTAL POLICY

Fabryka Armatur "JAFAR" S.A. manufactures sanitary, water, industrial, heating, gas, and marine fittings on the domestic and foreign markets.

The aim of FA "JAFAR" S.A. environmental policy is to design and manufacture such products that can minimise adverse environmental effects during production, usage and disposal of the products, and to achieve the intended effects of implementing the environmental policy in relation to the context of the organisation and stakeholders.

WE UNDERTAKE TO ACHIEVE THESE AIMS BY:

- ✓ Perfecting the Environmental Management System to improve the environmental effects of our operations,
- ✓ Establishing targets necessary to limit the contamination emissions and the organisation's negative impact on the environment,
- ✓ Meeting the obligations related to our compliance with legal and other requirements,
- ✓ Allocating the resources necessary to achieve the appointed goals and develop the environmental management system,

Tasks arising out of the Environmental Policy are mandatory for every employee of Fabryka Armatur JAFAR S.A. The top-level management of the factory shall provide the resources necessary to implement this Policy. Fabryka Armatur JAFAR S.A. maintains and continually improves the existing Environmental System to ensure continual improvement of its operations, including periodic reviews of general and specific targets of Fabryka Armatur JAFAR S.A. as concerns the Environment.

The Environmental Policy text has been approved by the management, copied and displayed in the organisation, and published on the Fabryka Armatur JAFAR S.A. official website.
